WHY WE NEED TRAILS

Studies have confirmed that recreation and trails are important to the residents of the Truckee Meadows. Trails are a way of life, and provide many benefits:

- a healthier community
- a thriving economy
- improve quality of life
- foster a community sense of place
- transportation alternatives

A MAJOR CHALLENGE IS FUNDING

Be a trail steward!

- Advocate for trails in your community
- Donate to support trails

The Power of Partnership
The Truckee Meadows Trails Initiative (TMT) is a community-driven effort designed to improve the range of opportunities for residents and visitors by identifying and establishing non-motorized routes for greater trail connectivity in the Truckee Meadows. The initiative started in 2017 with a coalition of land managers, government agencies, non-profits, and private businesses that came together to create the TMT Plan and Report.

**Goals and Objectives:**
- Create a regional trail network connected with public lands.
- Ensure high quality user experiences on trails.
- Promote Truckee Meadows natural, cultural and recreational resources.
- Coordinate and support trail-planning efforts with community partners.

**What We’ll Do Next**
- Priority projects for both new trails and the maintenance of existing trails.
- Detailed maps of priority trail projects.
- Land management agency adoption of the TMT plan so new development always includes trails.
- Maintenance agreements that allow trail crews to work between jurisdictions.
- Trail construction, signage, and wayfinding standards for the Truckee Meadows.
- Create a framework for the evaluation of projects.
- Formalize a Charter for working group involvement with Truckee Meadows Trails.
